Principal Risk Factors

The Fund is subject to a range of risks including:

- **Investment Risk:** The Fund may not achieve its investment objective and investors could lose capital. No capital protection is provided, and past performance is not indicative of future results.
- **Equities Risk:** The Fund's equity investments may rise or fall due to both overall market factors, such as investment sentiment and economic conditions, and individual company specific factors.
- **Political Risk:** The value of the Fund's assets may be affected by uncertainties, such as political developments, changes in government policies, taxation and currency repatriation and restrictions on foreign investment.
- **Currency Risk:** The Fund may hold assets denominated in currencies other than its base currency. Fluctuations in exchange rates can therefore cause the Fund's value to rise or fall.
- **Hedging Risk:** Any currency hedging strategy used may not achieve a perfect hedge.
- **Concentration Risk:** A concentration of investments in a limited number of markets, countries, asset types, or issuers, may result in the Fund experiencing greater volatility than investing in a more diverse array of assets.

Further Information regarding risks can be found in the Risk Factors section of the prospectus.

Glossary

OCF: The Ongoing Charges Figure is based on the annual expenses and this figure may vary from year to year. It excludes transaction costs including third party brokerage fees and bank charges on securities transactions. The OCF is expressed as a percentage of assets. It is deducted from the Fund and is already reflected in the performance figures shown. The OCF shown is the most recently available figure disclosed in the Fund's regulatory documents. For more information about charges see Fees and Expenses in the Fund's prospectus.

Article 8: The Fund is categorised as Article 8 under the EU Sustainable Finance Disclosure Regulation (SFDR). For further information please refer to the sustainability-related disclosures section at www.seilernfunds.com

MSCI World TR: The MSCI World is a broad global equity benchmark that represents the performance of large and mid-cap companies across 23 developed countries. The 'TR' (Total Return) version of the index includes the reinvestment of cash distributions, such as dividends, offering a more comprehensive view of performance than indices that only track price movements. The Fund uses the MSCI World TR as the benchmark index against which the Fund's performance is compared for illustrative performance only. The Fund is actively managed at the investment manager's discretion and its holdings and returns may diverge materially from the benchmark.

Performance periods: MTD - Month to date, QTD - Quarter to date, YTD - Year to date, ITD - Inception to date (meaning since share class launch date).
